8 Threads	4.015849	1600.0	1894.0	16305.3375	74	84	62	80	89	69	70	70										598	
16 Threads	8.925234	3200.0	11818.0	2576.893438	123	200	156	200	199	115	141	131	100	136	161	124	122	117	132	200	2357	Large differences are due to doubling contention and oversubscription. The average computer cannot support 16 threads individually	
* We track the average time the bidder spends between requesting the lock and requiring it, isolating contention cost from meaningful work done
